

LACY'S RED ANGUS & MC LIVESTOCK

# *Annual Production Sale*

October 22, 2022 - 1:00 PM - Drexel, MO

## *Welcome,*

Welcome to West Central Missouri & Lacy's Red Angus! Red Angus continues to lead the industry as cattlemen demand quality genetics with strong maternal traits. That is why the Red Angus/Red Angus influenced females continue to be the most sought-after female in the beef industry today. You ask why? It's all about the cow & the "ility"

- Motherability
- Fertility
- Docility
- Stayability

Once again, we are delighted to continue working with our marketing partners MC Livestock of Archie, MO. Nick, Callie & Stetson Curtis bring a great eye for cattle, integrity, and a tremendous amount talent & energy to the table.

This year's sale offering is the result of our efforts that started nearly four years ago when we planned the matings, bred/calved the cows and brought the animals through development. We attempt to not chase extremes but rather utilize genetics that we know perform. The vast majority of these animals carry the LACY prefix throughout their pedigrees & are backed by generations of cattle born/raised on our ranch. We will be offering a handful of Polled Hereford bulls & plan to increase our Hereford offering in 2023 and beyond as we continue to provide all the components to create the great "Red Baldy" female.

In an effort to provide you with as much information as possible, the bulls have all undergone genomic testing which has been incorporated into their EPDs. Carcass ultrasound data has been collected as well. All the bulls have undergone & passed an extensive Breeding Soundness Exam (BSE). The open heifers have all been fully vaccinated & subjected to a Reproductive Tract Score (RTS) as well as pelvic measurements. All of this data will be available prior to sale day.

We will continue to offer a select group of commercial Red Angus females. This small group of heifers come from Lacy's Red Angus bull customers, Robert & Gail Perryman of Urich, MO & Thoele Farms of La Cygne, KS. These females are either sired by "LACY" bulls or bred to "LACY" bulls.

Thank you for your continued interest in our operation. We are confident that we are offering you some of the highest quality cattle to sell anywhere in the country. We firmly believe in our genetics and their ability to perform, especially in fescue country.

You are welcome to view the offering anytime, whether it be at our ranch, on our website or on DV Auction. The sale videos will be available online in mid-October on our website as well as on DV Auction. Whether you intend to bid, buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, the sale will be broadcast live over the internet through DV Auction.

Regards,

**Dan & Kelly Lacy - Lacy's Red Angus**

## *Dear Friends and Customers,*

Hello and Welcome to the Lacy's Red Angus and MC Livestock Annual Production Sale. As Red Angus genetics continue to be some of the most sought after in the beef industry, whether that be Red Angus females, feeder calves or herd sires. The Red Angus breed is valued by many.

The Lacy family for years has prided their operation on red hided cattle that are adapted to fescue country and can thrive in this environment. We are sticking true to those same attributes each year in our own operation. The cattle in this offering share the same adaptability that the Lacy family has been building for generations and our customers have come to know and love.

This year's offering has several sons and daughters by "Iron Mike" and other tried and true sire groups, many raised right here in Drexel, Mo. The bulls come in an easy calving package that have hit the ground with a lot of vigor and packed the pounds on ever since. The females in this sale exemplify what our operations strive for in brood cow; easy fleshing, fertile, females that will last a lifetime. Several of the females go back to leading matriarchs in each of our operations and we believe they will have a lasting impact on many different operations in the future. They are eye appealing, structurally correct, broody females that have been bred and raised to do their job with little supplementation on fescue grass.

We would like to personally invite you to come by for a visit and evaluate the cattle on October 22nd. As you study this year's offering if you have any questions, feel free to reach out to any of us, we would be glad to answer any questions. If you would like to view the offering prior to sale day we would be glad to show you around. Thank you for your interest and we look forward to seeing you.

Regards,

**Nick, Callie & Stetson Curtis - MC Livestock**

*Fellow Red Angus Enthusiasts,*

Interesting times call for a product that meets the needs of the challenge. Those that run stock in the fescue belt of our nation will find what they need between the covers of this sale book. Lacy Red Angus and MC Livestock bring you stacked generations of fescue adapted and tolerant seedstock with added performance and maternal values as well.

The foundation of the reputation of this set of stock is backed by well over 50 years of selection pressure and dedication to doing the right thing every instance of the selection process. Dale did not allow for fertility or udder issues, having a Hereford background made him very unforgiving of nonsense. Disposition has never been a debatable topic in the sorting pen and that is noticed still today. The overall maternal instinct is instilled in every lot throughout this offering as well as the ability to last and pass every test that any operation has to offer.

These two firms have placed elite Red Angus herd bulls with some of the business' most discriminating breeders with very positive praise. Quite possible one of the hottest sire groups in the country would be by a past sale feature known as Collusion. These cattle have been well received for a multitude of reasons. A sensible and desirable balance of phenotype and data is certainly the driving force as the overall quality can rival any sire group in the business. Collusion wasn't a result of "fly by night success", as he has multiple generations of proven sires and cow families influenced by the stringent selection pressure used by these two outfits yet today.

Collectively, the cattle in this book are the product of two people living the American Dream. A couple that bought land with strong faith and a pinched penny. A couple that only new hard work, patience, and grit as the driving force on their road to success doing what they loved. They maintained a firm belief in the good stuff known as "common sense" and the guidance and leadership from their known savior. This couple grew a family and instilled the foundation family values within their children so that they could do the same for their families down the road. Dale and Kay Lacy didn't know that they were building a legacy and an empire, but they achieved it without question. That is why they have more repeat business and new business on an annual basis and that's what solidifies your interest in the program. Please join us for another outstanding set of fescue bred and developed Red Angus seedstock from the next generation at Lacy Red Angus and MC Livestock.

*Enjoy the cattle,*

# PREMIUM RED BALDY PROGRAM

Take advantage of hybrid vigor by maximizing the best traits of both Red Angus and Hereford, producing premium replacements.

The program helps producers access genetically verified females that have the best combination of longevity, fertility and adaptability.

The Premium Red Baldy program has the ideal balance of maternal and carcass traits which will yield cattle poised to increase the profitability of the commercial producer.

## Premium Red Baldy

- Females only
- Red Angus or Hereford sired
- Top 50% of breed for HB or BMIS Indexes
- Red bodied with bald or brockle face

*No enrollment fee, 99¢/tag  
Not a USDA Process-Verified Program*

## Missouri Red Angus Association Fescue Belt Certified Program

Many of us who live in the “fescue belt” have experienced the problems associated with importing newly purchased cattle into our environment. What we’ve seen is a significant percentage of cattle that have not been raised on fescue struggle to perform after being imported onto this “grass we love to hate”. Some animals eventually overcome this issue, but many will not and will eventually be culled from the herd.

Fescue toxicity results from toxins called ergot alkaloids, which are produced by a fungus called endophyte that grows within the fescue plant. Cattle experiencing fescue toxicosis may exhibit rough hair coats, heat stress, suppressed appetite, poor growth rates, reduced reproductive performance, and in some cases lost tail switches or even hooves. The decreased animal performance seen during the “summer slump” of cool-season pastures is made even worse by these toxic effects of fescue.

Research on the subject of fescue management has been done for years. Several strategies can be used to mitigate the toxic effects of fescue, including removal or suppression of seedheads, overseeding of pastures with legumes or other forages, and good mineral supplementation programs. However, fescue remains a serious challenge. The USDA estimates fescue toxicosis costs the U.S. beef industry an estimated \$600 million to \$1 billion annually in lost revenue because of reduced reproductive and growth rates in cattle herds.

The entire state of Missouri is situated within the fescue belt. Since fescue was introduced into our region, Missourians have built their herds retaining only genetics that have proven to be “fescue tolerant.” When looking for Red Angus genetics, look for the MORAA FBC logo & cattle that have “Bred-in Fescue Tolerance.”

# THE BULL GUARANTEE

Unless otherwise noted, all the breeding age bulls will have passed a breeding soundness exam prior to the sale & are guaranteed by the seller as outlined by the "Red Angus Association of America Suggested Terms & Conditions". This guarantee does not cover injury, death or poor management.

## PROPER MANAGEMENT OF YEARLING BULLS

### INTRODUCTION

Yearling bulls represent a large commitment to beef operations. Besides their purchase price, they are the future genetic material of the herd that can influence several generations of stock. Because yearlings still have a significant amount of growth and development ahead of them, they require a higher level of care and management than their older counterparts. This is especially true now as yearling bulls can possess considerably more genetic potential for growth than their ancestors.

### PREBREEDING SEASON MANAGEMENT

#### Nutritional Management

One of the most common complaints of yearling bull purchasers is the run down condition these bulls can exhibit after their first breeding season. This situation can be largely avoided with good bull management. Whether the bulls were developed on the ranch, in a commercial facility, or at a centralized bull test, they were probably fed to gain from 2.5 to 4.0 pounds per day from weaning to one year of age. After coming off of test, and until they are turned out with females, they should continue to gain around 2.0 pounds per day.

Dry matter intake, energy and protein requirements as well as diet formulation is provided as a management aid. Bulls grazing a grass paddock may need to receive 8 to 13 pounds of grain per day, similar to those on dry hay. Some will argue that bulls should not be pampered with grain supplements, but to insure a long and reproductive life, their basic nutrient requirements must be met. Quality of forage is extremely important to formulating proper bull diets. Many diet formulations can easily satisfy yearling bull maintenance and growth requirements. For example, some producers will allow bulls to graze cereal grain pastures with minimal supplementation, while others will have to feed a complete diet in a drylot situation.

#### Protein Requirement

After achieving their first birthday, bull's protein requirements settle to about 10% of their total diet, depending on their dry matter intake. Usually this requirement can be met by adding one pound of a protein supplement per day to the grain portion of the diet. If high quality forage (pasture or hay) is fed, the additional protein supplement may not be needed. Forage testing and balancing the diet will pinpoint supplemental needs.

#### Mineral Requirements

Calcium and phosphorus are major minerals. Diets that contain approximately .40% calcium and .20% phosphorus are sufficient to meet dietary goals. The ration between calcium and phosphorus should be maintained at 2:1 or greater. In addition, trace mineral requirements should be met. Research has shown that feeding zinc at 60 ppm of the diet is beneficial to male reproduction. Other trace minerals like copper, manganese, and selenium should be monitored. Many commercial sources of trace minerals are available, but if desired a mixture of 40% dicalcium phosphate, 20% limestone, 30% trace mineral salt and 10% Selenium 90 premix can be used.

#### Vitamin Requirement

Any diet that includes high-quality, green forages should provide enough vitamin A to meet the yearling bull's requirement. Vitamin A is inexpensive to feed, and therefore diet fortification near 30,000 IU per day would be cost effective. If forages are weathered and/or of low quality, an intramuscular injection of 3 million IU of vitamin A is advisable. Injectable vitamin A will maintain adequate liver stores for over 100 days.

### BREEDING SEASON MANAGEMENT

#### Number of Females

Setting absolute guidelines for cow-to-bull ratio is difficult because there are several variables that have an impact on this number. Examples are a bull's age, size, condition, and sex drive. Environmental factors like: size of the breeding pastures, type of terrain, climate, and length of the breeding season can also affect the correct cow-to bull ratio. Absolutely, a yearling bull will not be able to service as many cows as an older counterpart. As a rough guideline, however, the working range is approximately 10 to 25 females per yearling bull during a 45 to 60 day breeding season.

#### Length of Breeding Season

A maximum of 45 to 60 days is an ideal length of breeding season for yearling bulls. Ninety days is an absolute maximum. One method of saving wear and tear on a yearling is to turn him out after an older bull has been with the herd for the first one or two heat cycles. Some producers rotate bulls in and out of pastures to assure a lazy bull's mates can get covered by another. Regardless of the management style, it is not advantageous to run yearling bulls with cows for long periods of time. They will waste a considerable amount of energy chasing cows and losing body condition instead of building up reserves for the next breeding season.

Try to observe the yearling bull closely to make certain he is detecting heat and breeding cows. Also, keep an eye on his condition. If he is getting too thin and rundown, he needs a rest. Thin bulls are more apt to hurt themselves, become less fertile, and have increased nutritional needs after the breeding season. Yearling bulls should not be pastured mated to cows that are extremely larger than themselves. Physically, this height mismatch may cause injury and failure to mate properly.

### AFTER THE FIRST BREEDING SEASON

#### Feeding

Yearling bulls will probably lose from 100 to 300 pounds during their first breeding season. In addition to gaining back this weight during their first rest, they must also gain enough body mass as to achieve 75% of their mature weight by their second birthday. For example, if a bull's potential mature weight is 2,000 pounds, he should weigh at least 1,500 pounds at two years. If he weighed 1,250 pounds at turn-out time as a yearling and lost 200 pounds during the breeding season, he would need to gain about 2.0 pounds per day during the nine months until his second birthday. In order to gain 2.0 pounds per day, coming 2-year-old bulls may need to be fed 13 pounds of grain, protein supplement, and a full-feeding of hay. High quality forages could be utilized to reduce the grain and supplement portions of the diet. A word of caution: do not try to bring a bull back too fast with too much grain because of risk of foundering him.

#### Health Management

In the fall, after the first breeding season, treat the bull for internal and external parasites. The following spring, when he is two-years old, deworm him again and give him annual booster vaccinations against the diseases listed earlier.

- These age-advantaged bulls not only add value through their ability to immediately cover more females, but also by carrying the genetics to add to the bottom line of your calf crop. 1024 certainly accomplishes that.
- This older Iron Mike son shows why this sire group will be popular on sale day. His massive 940 lb. adj. weaning weight and 1,580 lb. adjusted yearling weight show this bull's elite performance ability. He's among the breed's elite for WW and YW EPDs (Top 5%).
- While his individual weights are impressive, so are his carcass genetics! Luke 1024 stacks up in the top 4% for Gridmaster, top 5% for CW, top 8% for REA, and top 10% for MARB.
- A bull that will catch your attention with his captivating presence and mass!
- *Retaining 1/2 Revenue Sharing Semen Interest.*

LACY FULL TANK 021J

- This 50% Red Angus composite baldy is a stud on the hoof! A powerhouse sire prospect that looks like a herd bull from every angle.
- Full Tank 021J is an all-around performer that excels in carcass merit. The only Full Tank son in the entire offering, he was only 74 lb. at birth. He was a little later in the calving season, but he's coming on strong as he matures!
- If you like your calves to get to weaning and explode with growth, this bull is one to consider. His own growth curve indicates that he can sire the type, while also boasting a 4.31 IMF scan.
- Scoring in the top 8% for his ProS index, 021J is built to help your herd profit. He's also top 12% for Gridmaster and top 27% for Herd Builder. Whether you want good feeders or keeper heifers, he has the potential to do both!
- The dam of LACY Full Tank 021J is a registered Hereford cow that offers tremendous udder quality, fleshing ease, and pigment. This hybrid bull is certain to heterosis to your next calf crop.

LACY FULL TANK 006D - SIRE OF LOT 6

LOT 7

LACY QUINDARO 056J

- When it comes to pedigree, these flush brothers absolutely check the box. The Iron Mike sons are the spotlight sire group of this offering, and dam 8105 has written quite the resume of her career. The last two sales have been topped by 8105 sons at \$33,000 and \$32,000, respectively.
- Quindaro 056J is especially impressive on the hoof. He's massive from all angles, built well from the ground up, and carries himself like he knows just how good he is. Analyze 049J and you'll find a bull who is a complete, high-quality individual.
- These are the kind of bull that can do it all when mated to mature cows. 056J excels in all three Red Angus indexes, with his ProS and Gridmaster both being in the top 20% of the breed and Herd Builder still well above average, all while ranking in the top 5% or better for WW, REA, and CW. 049J is hard to fault in his paperwork, ranking above breed average for 14 of the 19 traits published by RAAA. He's the higher ranking of the brothers for Herd Builder, being in the top 35%. You will love the daughters for mature size, milking ability and longevity.
- If you need to add pounds without giving up carcass quality, Quindaro 056J and Iron Mike 049J fit the bill. This is a pair of future herd sires that will be on everyone's short list.

LACY LAKOTA 8105 - DAM OF LOTS 7 & 8

LOT 9

MCL MARSHALL 1534

LOT 10

MCL IRON MIKE 1522

- Another powerful punch from the Iron Mike sire group! The dam of this trio is a hard-working donor female whose production record is one to admire. 405 sons are the kind to build a breeding program around.
- It will be easy to find the smooth, herd bull look of 1522, and you have to appreciate the balanced and attractive, no holes pattern that 1534 presents as well. But don't let the pictured brothers overshadow 1526. He's loaded with the same growth and carcass genetics, plus was only 55 lb. at birth.
- Awesome genetic profiles in terms of growth, maternal function, and carcass merit. 1522 ranks in the top 10% of the RAAA database for 5 traits (WW, YW, ADG, CW, REA) plus top quarter for Gridmaster, MARB, and ProS. If you love explosive growth, 1534 fits that mold even better. He is the #2 weaning weight bull in this class and is top 1% for WW, CW, and REA EPD, top 3% for YW, top 4% Gridmaster and top 5% for MARB. Just like his brothers, 1526 brings top of the breed growth and marbling genetics to the offering.
- This trio of ET flushmate brothers are maternal sibs to the late LACY 1776 020D, an influential herd sire that has left his mark on the business. These brothers combine the influence of the LACY Lakota 8014 and LACY Annie 405 cow family, offering a unique genetic combination that will result in profitability!

- The Iron Mike sons are heavyweights in terms of their growth and carcass genetics, and 1503 is yet another example. He started small (55 lb.), but he caught up to his pen mates by weaning time!
- His genetic profile reads like a bull who will help you make money: top 6% REA, top 9% WW, top 11% YW and Gridmaster, top 18% MARB.
- Load your trailer with these Iron Mike sons and reap the benefits when you sell their first steers.

- A phenotypic standout full of mass, muscle, and extra eye appeal.
- A great candidate for adding pounds of pay weight to a set of calves from mature cows, 1525 weaned at over 750 lb. himself and has the EPDs to back it up, being top 18% for WW and top 27% for YW.
- If you retain your own steer calves, this lad is in the top third of the database for REA and MARB. Your feeder calf buyers will like them.
- The Iron Mike sons were the highest weaning weight sire group in this year's offering. They're bringing forward his phenotypic excellence, practical performance, and strong genetic profile to be valuable to the cowmen who add them to their bull battery.

LACY LANA 7025 061H - MATERNAL SISTER TO LOT 14

- The Iron Mike sire group will be popular among buyers, and bulls like 060J speak to the depth of quality in these calves.
- A growth genetics bull with carcass quality in his profile as well. He's in the upper quarter of the breed for both WW and YW EPDs while boasting an elite MARB figure in the top 8% of Red Angus bulls.
- His mother has been a strong producer for a long time. You don't see many 2007 model cows still putting sons into bull sales!

LACY CENTERPOINT 448 025F - SIRE OF LOT 19

LOT 20

LACY COLLUSION 075J

- Marbling and longevity are the calling card of this son of Lacy Collusion 115F. These Collusion sons will add value in these areas without sacrificing growth and performance. His dam is a nice producing Saga daughter.
- 075J is a unique genetic package, ranking in the top quarter of the breed for all 3 indexes. He's elite in his genetic profile for Stayability (top 5%) and MARB (top 7%).
- Powerfully constructed with extra look to go with his natural thickness.

- A higher growth package from the Collusion sire group, he's a big-time performing bull that weighed in at 777 lb. at weaning.
- Dam is a 2013 model, while 1530 ranks in the top 3% of the breed for stayability EPDs. These cattle are bred to last.
- Ranking in the top 14% for WW and top 17% for REA among Red Angus make him an all-around package.
- Functionally built with a cool look, his calves will catch your eye in the pasture.

- Only a 72 lb. birth weight on this young Collusion son.
- Top 1% of all Red Angus for Herd Builder, 1515 is one you will want to keep all the heifers from. He also ranks top 12% for the ProS all-purpose index and top 18% for Milk EPD.
- Infuse these bloodlines into your program to make functional brood cows.

LOT 23

LACY 1776 070J

HFRA MS CORNERSTONE H006 - MATERNAL SISTER TO LOT 23

- From light birth (74 lb.) to heavy weaning (730 lb.), 1776 070J has been a performance machine all his days!
- Dam is a daughter of Lacy Lakota 8014, a cow who needs no introduction around this program. She's best known for being the mother of 020C, who is best recognized as the dam of Iron Mike.
- Ranks in the top 2% of the breed for WW, top 3% for YW, top 7% for MARB, top 9% for Grid Master and top 12% for the all-purpose ProS index. Lots of potential in his genetics.
- Rugged built, power packed bull. He's the right kind for adding pounds!

LOT 24

LACY 1776 036J

LACY 1776 002D - SIRE OF LOTS 23-26

- "Balanced" is the word that comes to mind when analyzing this "1776" son's genetic profile. He is above average in all three Red Angus indexes, and above average for ten other EPDs. Not many chinks in his armor!
- Well-built with enough mass, muscle, and eye appeal. A balanced type of bull.
- 036J is a prime example of the program built here, as his dam is a 9-year-old cow and a direct daughter of the cornerstone 8190 female. Strong maternal lineage.
- Weighed in just shy of 720 lb. at weaning, well exceeding the average of his contemporaries.

- High growth figures on this guy, ranking in the top 6% for both WW and YW EPDs.
- While there aren't many sons of 1776 in the offering, you will appreciate the quality he stamps into his sons. They carry eye appeal and muscle mass.

LOT 27

MCL WOODROW 1542

- MCL Woodrow 1542 is a high quality LACY MC Desperado 003G son that was raised by a young dam by LACY Iron Mike 005E who is getting the job done in production!
- He is a stockman's type of bull: soggy, stout, and sound. This is one you will continue to like as he matures.
- One of the heavyweights of this class of yearlings at 765 lb.
- Top end growth and maternal genetics in his profile. Top 10% ProS and Herd Builder. Top 5% WW. Top 6% REA with a well above average MARB.
- *Retaining 1/3 Revenue Sharing Semen Interest.*

- This Desperado son truly has no flaws in his genetic profile. He's above average in 14 traits, and in the top 60% in all 19 traits. As balanced as you can make one on paper!
- 1516 is his dam's first calf. His maternal pedigree goes back to the awesome 8190 donor female, dam of Mov'n On and countless productive females.
- He will add style and eye appeal to his calf crop in addition to his functional genetics.

- A Desperado son out of a first calf heifer. You must admire the quality Desperado is putting in these bulls on their mothers' first try.
- A modest 72 lb. at birth to 730 lb. at weaning for curve bending performance.
- A strong index value bull, 1519 ranks in the top 13% for ProS, top 18% for Herd Builder, and top 28% for Grid Master. This is a calf with a genetic profile that works in any production situation you want to put him in.

- Legacy 417 son out of a first calf female who traces back to 8105. A genetic package that is the prime example of this breeding program.
- Top 10% for both ProS and Herd Builder indexes, while being solidly ranked for Grid Master as well. Some of the best CED and BW EPDs in the offering if you are needing to breed heifers.
- Weighed in at 756 lb. at weaning, 026J is a bull that offers a lot of versatility.

LOT 46

LACY LANA 7025 052J

- What a way to lead off the yearling heifer offering than by highlighting the cow family that is so prominent in this program; the “Lana” tribe. 7025 is an integral part of this program, and we offer you the opportunity to acquire three direct daughters in Lots 46, 47, and 48.
- Study the 052J female and you’ll find a bold ribbed, broody female that packs muscle and power into a lady-like package. 050J presents the same attributes with even more added style. 051J fits the same mold and is worth finding on sale day.
- The genetic profiles of all three sisters offer opportunities to move a herd forward. 052J is the high MARB and Herd Builder female of the trio with excellent growth figures. 050J offers more balanced on paper, yet still excels in growth traits. And for overall carcass quality and massive growth genetics, 051J certainly fits that bill. Hard to go wrong with any of the three options.
- Without question, these sisters have the potential to be herd leading females that make their mark on many Red Angus breeding programs.

- A Desperado on an Independence x 7025 cow, these are genetics that successful throughout the program. Study the bulls offered today and you'll see how well they're working!
- Square hipped and good in her design are the standout traits of the 1527 female.
- She possesses as balanced a genetic profile as any animal in the offering. Sixteen of her EPDs are in the top 60% of the Red Angus breed, including top 8% MARB and top 19% CED.

HRR COPPERHEAD E064 - SIRE OF LOT 49

LACY MCL DESPERADO 003G - SIRE OF LOT 50

LOT 51

LACY LILLY 020C 088J

LACY IRON MIKE 005E - FULL BROTHER TO LOTS 51 & 52

LACY LAKOTA 8014 020C - DAM OF LOTS 51 & 52

- The influence of Lacy Lakota 8014 is found throughout this offering. Here's a chance to tie into several females that trace to this leading herd matron, starting with a pair of full sisters to the "Iron Mike" herd sire that is creating quite a buzz around here.
- 088J has the look of a future star donor: high volume, elegant, yet powerful when you view her from a mass and muscle perspective. Don't forget about the non-pictured 048J. There's just not enough time to get all the good ones in front of the camera every year!
- 088J boasts top-end growth genetics (top 8% WW) while still ranking above breed average for CED. She's also an elite ribeye female, ranking top 2% for REA. The 048J offers equal excellence for REA with a more moderate growth trend. Both females have the genetic profiles that will make functional females.
- If you were a fan of the Iron Mike sons, there's no better chance to tie into the female influence than by bidding on one (or both) of his full sisters.

- The 1776 sire strikes with a daughter that you'll be sure to find. Her dam is a 2009 model and still producing quality cattle. Can't top this pedigree for functional livestock.
- A no-holes EPD profile that you can breed this female in so many directions.
- Cowy made heifer with all the right pieces to be a functional female for a long time.

LACY 1776 002D - SIRE OF LOT 53

LACY LAKOTA 9049 - DAM OF LOT 53

LOT 54

MCL LAKOTA 061D 1501

- You'll like this Declaration female out of a solid, hard-working dam.
- Excels in her growth figures, ranking in the top 3% for YW and top 9% for WW EPDs.
- If you are searching for a female with added eye appeal, 1501 will be on your short list. She's sharp in her lines and beautiful from the profile.
- Vast mating possibilities for this female!

LOT 55

MCL LAKOTA 403 1513

LACY LEGACY 6097 417 - SIRE OF LOT 55

- 1513 is a granddaughter of Lakota 8014. The dam of 1513 is an 8-year-old cow that has always done a good job. Legacy 417 on the top side only adds to the maternal prowess of this female.
- Elite Herd Builder genetics, ranking in the top 1% of the entire Red Angus breed. Additionally, 1513 is top 8% for Pros, top 12% for MARB, and brings positive growth and calving ease to the table. Total package genetics.
- Stout featured female with plenty of foot size, bone, and muscle shape. Really good hipped and level topped add to her eye appeal.

- Collusion sons are a feature on this sale. He's a sire of elite ProS and Herd Builder cattle. Dam 7108 is a young 15-year-old cow that is still going strong!
- Top 4% for Herd Builder and top 10% for ProS. She also shines in carcass merit, being above average for both REA and MARB.
- Functional, productive genetics that will add quality to your heifer pen.

- Another powerful Copperhead! While not many offered in this set, you'll appreciate them.
- Ranking top 2% for YW and top 4% for WW, she will add pounds to her progeny.
- This is a prime candidate for raising your next herd sire.

- This Iron Mike daughter is a feature open heifer offering! Her Expectation dam is one of the hard-working females this program is built around.
- The picture tells the story with this female. 1553 is cool looking with plenty of mass, shape, and muscle. She does a lot of things very well and is the front pasture type.
- Top 13% WW, Top 20% REA and MARB, top 24% YW. A genetic profile that will help keep you profitable. Do not miss this one!

- The Iron Mike sons will be highly sought after, and his daughters will be no exception.
- Above average in all 3 indexes while boasting top 7% WW and top 10% YW EPDs.
- Big ribbed and correct in her design. This young lady will make the short lists when you analyze the cattle on sale day.

- Another Iron Mike to add to your load of quality females.
- She's on the plus side with her genetic evaluations for weaning, yearling, milk, longevity, and ribeye. Lots of genetic value to offer here.
- Plenty of brood cow potential when you study this one's record.

- A daughter of Cornerstone with a little unique twist on the maternal side, as her dam is sired by Malbec. This is the first calf for her dam, who will be here a long time!
- 1524 ranks above average for her growth trait EPDs, as well as all three of the Red Angus indexes.
- Yet another functional female prospect to add quality to your herd.

- This 029J female is an example of why the Freight Train daughters are well received!
- One of the more unique genetic packages in the yearling heifer offering. Above average for 13 genetic predictors, including all three indexes. She excels in growth, maternal, longevity, and carcass traits. One to certainly add value through her progeny.
- A moderate, chunk of a female. She's stout, functional, and looks like a legit cow prospect.

- While the Chateau genetics aren't as prevalent in this offering, the ones that you find are solid cattle. 043J's dam is just getting started in her production career.
- A ProS and Grid Master specialist, she ranks in the top 22% for Grid Master while still being above breed average on ProS. Also ranks in the top 7% for REA.
- Heifers with 043J's pedigree and genetics can be bred to almost any bull you want to use with success.

LACY COLLUSION 044H - MATERNAL BROTHER TO LOT 70

LOT 72

LACY MS REBALAS 6155 011J

- What a female to start the bred heifer offering!
- Super attractive female! She's fancy, correct in her build, and a definite sale feature bred heifer.
- Her dam is a 2006 model that still raises "the good ones". Take the opportunity to study all three of these Full Tank sired bred females.
- All-around genetic profile! Upper third of the breed for all three indexes, plus well above average carcass EPDs.
- *AI bred on 5/23/22 to Bieber CL Energize F121 (RAAA 3958815). PE from 5/28/22-7/29/22 to MCL Yellowstone 0523 (RAAA 4418893). Safe AI. Estimated due 3/3/23.*

SIRE A

LACY IRON MIKE 005E

LACY Iron Mike 005E is one of the most intriguing herd bulls ever produced at Lacy's Red Angus! Lacy Iron Mike 005E has one of the largest sire groups of progeny in this year's sale. The cattle by "Iron Mike" are moderate, bold bodied, square built, and have extra eye appeal. We love the daughters by "Iron Mike" and are confident that they will play a role in the future of our breeding program.

LACY LAKOTA 8014 020C - DAM OF LACY IRON MIKE 005E

LACY Collusion 115F topped our sale in 2019 to C-Bar Red Angus and Holton Cattle Company at \$33,000. He created a stir across the Red Angus breed due to the unique combination of phenotype, maternal excellence that supports his pedigree, and the extremely balanced number profile that he possesses. Lacy Collusion 115F is an extremely dense made, sound footed, masculine herd bull that is transmitting his balanced and proven genetics to his progeny. The dam of Lacy Collusion 115F, LACY Lakota 8105, is the high income producing female at Lacy's Red Angus.

LACY 1776 002D

LACY 1776 002D is arguably one of the stoutest, longest bodied, and most impressive sons of 5L Independence 560-298Y that was available to utilize. We unexpectedly lost "1776" but fortunately we do have a small inventory of semen stored and plan to continue to utilize his service moving forward. "1776" was a bigger framed, larger outlined bull that boasted a beautiful dark cherry red hide color. He was a great footed and sound built bull that consistently transmits athleticism to his progeny.

SIRE D

LACY LEGACY 6097 417

LACY Legacy 6097 417 is a foundation herd sire at Lacy's Red Angus that is rich in pedigree and tradition, backed by the most influential individuals ever raised good in Drexel, Missouri. He combines the influence of LACY FHG Legacy 6097 and CCF Gold Bar 0251, two very influential sires that have left behind daughters with tremendous maternal value.

LACY MOV'N ON 417 063G

LACY Mov'n On 417 063G is one of the top sons of LACY Legacy 6097 417 that is backed by one of the true matrons of the donor pen, LACY Marie 8190. LACY Mov'n On 417 063G is a very complete, smooth made son of "417" that is balanced numerically that ranks among the top 7% of the breed for ProS, top 9% GM, top 18% Milk, and top 23% Marb. We love the foot shape, depth of heel, body shape, and dimension that he brings to the table. He is owned with Beef 360, LLC Brookfield, Missouri.

RED U2 BAD MOON RISING 411F

Red U2 Bad Moon Rising 411F was our selection from the famed U-2 Ranch of Alberta. Cheramie Viator was at the U-2 sale a few years back and tipped us off about a son of Red Howe Hesston 212C that was backed by the prolific Red U-2 Anexa 271Y donor dam, one of the most impressive Red Angus females ever produced at U-2 Ranch. We made the investment and are certainly glad to have "Bad Moon Rising" here in Drexel. Watch for his influence moving forward as we incorporate the strong maternal lineage that lines his pedigree here at Lacy's Red Angus and MC Livestock.

RED U-2 ANEXA 271Y - DAM OF BAD MOON RISING 411F

SIRE G

SC HARD DRIVE H508

SC Hard Drive H508, affectionally known as "Eddie" is a very unique son of the late Bieber Hard Drive Y120 that is backed by the strong and prolific Harmony's Windsong 0269 cow family. It is no secret that Bieber Hard Drive Y120 has left a substantial mark on the Red Angus breed and the beef cattle industry as a whole. We have always admired the breeding program at Shoal Creek Ranch and had the chance to purchase SC Hard Drive H508. He will be used extensively in order to align his royal pedigree with the foundation genetics of our program.
