

Born on Fescue. Raised on Fescue.

Lacy's Red Angus 4th Annual
BULL & FEMALE SALE

OCTOBER 27, 2019 - 1:00 PM - DREXEL, MISSOURI

Welcome,

We are proud to welcome you to West Central Missouri & Lacy's Red Angus! Red Angus continues to lead the industry as cattlemen demand quality genetics with strong maternal traits. That is why the Red Angus/Red Angus influenced females are still the most sought-after females in the beef industry today.

What a difference a year makes. 2019 has been everything 2018 wasn't! With plentiful rain & reasonably cool temperatures throughout the summer, grass has been plentiful & cattlemen's spirits have been rejuvenated.

Once again, we believe the cattle are all in great shape and the bulls have all undergone genomic testing which has been incorporated into their EPDs. Carcass ultrasound data has been collected as well. All the bulls have undergone & passed an extensive Breeding Soundness Exam (BSE). The open heifers have all been fully vaccinated & subjected to a Reproductive Tract Score (RTS) as well as pelvic measurements. All of this data will be available prior to sale day.

Hoping to provide our customers with a marketing advantage in today's challenging feeder calf market, we continue to be a "Top Dollar Angus Seedstock Partner". Top Dollar Angus has numerous buyers and feedlots that are willing to pay premium prices for high-end Red Angus feeder calves. As we move forward, top quality cattle with high-end carcass traits will bring the premium over average cattle. Regardless of the size of your operation, we encourage you to consider this program or the FCCP Feeder Calf Program & explore how you can obtain premium prices for your quality feeder calves. As you browse through the catalog, you will find a large percentage of the bulls are "Top Dollar Angus" eligible & so noted by the Top Dollar Angus logo. Feel free to contact me or the RAAA Marketing Specialist, Harold Bertz for additional information.

We will continue to offer a select group of commercial Red Angus females. This small group of heifers come from Lacy's Red Angus bull customers, Robert & Gail Perryman & Henke Farms. These females are sired by "LACY" bulls and in many cases out of cows sired by "LACY" bulls.

Thank you for your continued interest in our operation. We are confident that we are offering you some of the highest quality cattle to sell anywhere in the country. We firmly believe in our genetics and their ability to perform, especially in fescue country.

You are welcome to view the offering anytime, whether it be at our ranch, on our website or on DV Auction. The sale videos will be available online in mid-October on our website as well as on DV Auction. Whether you intend to bid, buy or just come visit, we truly look forward to seeing you on sale day. If you are unable to attend, the sale will be broadcast live over the internet through DV Auction.

Regards,

Dan & Kelly Lacy - Lacy's Red Angus

1:00 PM - 4th Annual
Lacy's Red Angus Bull & Female Sale

Fellow Red Angus Enthusiasts,

Welcome to the 4th Annual Lacy's Red Angus production sale! Once again an elite offering of Red Angus seedstock will be offered for your appraisal on October 27, 2019 in Drexel, Missouri. Although we all experienced a difficult winter season, we have been blessed with a mild summer with tremendous rainfall in this region that has allowed for a surplus of grass to graze. With this being said the Red Angus breed continues to gain momentum in the commercial sector of the business. The breed has experienced record growth, increased registrations, and more breeder enthusiasm than ever before. It is no secret that red-hided cattle are taking the lead with the popularity vote in all sectors of the beef business due to their ability to adapt, convert, and survive. Longevity, fertility, and fleshing ability go hand in hand when it comes to the topic of discussing the key traits of practicality in the beef business.

Lacy's Red Angus cowherd has been built upon these traits of importance since the beginning. Fundamentally correct cattle that are built to last and thrive in a fescue based forage environment. Through disciplined selection, the females are mated to breed leading AI sires that offer superior phenotype, balanced genomics, and most importantly a fundamentally correct build. Females such as Lacy Lakota 8105 and Lacy Marie 8190 have a significant impact on this offering through the influence of sons, grandsons, daughters, and granddaughters that have surfaced as standouts. The strong maternal impact that these females have on the cow herd will be everlasting for generations.

We invite you to join us at the ranch on Sunday, October 27th, 2019 in Drexel, Missouri. The videos of the sale cattle will be available the week prior to the sale at DVAuction.com. In the event that you will not be able to make the sale, a real time broadcast will be available at DVAuction.com to bid from the comfort of your home. If you have any questions regarding the sale offering we welcome your calls and inquiries. We hope to see you sale day at Lacy's Red Angus!

Enjoy the cattle,

A handwritten signature in black ink, appearing to read 'Josh Blawie'.

PERFORMANCE PROGRAMS

THE TOP DOLLAR ANGUS PERFORMANCE PROGRAM

Top Dollar Angus:

Top Dollar Angus™ is a genetic certification and marketing company. We are completely focused on the best Angus/Red Angus-based feeder cattle/calves in the beef industry. We provide third-party genetic certification services for qualified groups of cattle and will assist in getting your cattle sold at top market prices. Once your calves are certified, they can be marketed as brand-identified Top Dollar Angus feeders. We have a premium network of cattle feeders representing over 100 feedyards who are seeking more than one million head of verified Top Dollar Angus feeder cattle and calves. These feedyards want to buy the best Angus genetics available, and are willing to pay prices above the average market to get them. Why? Because cattle feeders know Top Dollar Angus deliver superior growth and carcass performance time and time again. They are genetically designed to do exactly that!

Many bulls qualify for this program, and are noted within the sale catalog. For addition information, please visit: www.topdollarangus.com

THE SHOW-ME SELECT REPLACEMENT HEIFER PROGRAM

Missouri Show-Me Select Replacement Heifer Program

Any person wishing to qualify heifers in the Show-Me-Select Replacement Heifer Program must be a member of Show-Me-Select Replacement Heifers, Inc., and officially enrolled. An annual membership fee of \$25.00 will be assessed from each producer. This membership fee is due at either one of two enrollment deadlines, February 1st or September 1st. Producers must enroll by notifying one of the Regional Contacts listed on this sheet.

Strict guidelines for sire selection are required to help minimize calving difficulty. Eligible sires must have a known ID and be registered with their respective breed association. Red Angus sires must have a CED number of 9.0 or greater to qualify for use within the Show-Me Select program. All bulls in the sale that qualify will be noted. Many qualify for this program.

For more information: <http://agebb.missouri.edu/select/>

Program Objective:

- Implement a Total Quality Management strategy to on-farm heifer development
- Enhance marketing opportunities for and add value to Missouri-raised heifers
- Provide a reliable source of quality replacements based on management, reproduction, and genetics

PROPER MANAGEMENT OF YEARLING BULLS

By Twig Marston - Extension Beef Specialist
Department of Animal Sciences and Industry
Kansas State University, Manhattan

INTRODUCTION

Yearling bulls represent a large commitment to beef operations. Besides their purchase price, they are the future genetic material of the herd that can influence several generations of stock. Because yearlings still have a significant amount of growth and development ahead of them, they require a higher level of care and management than their older counterparts. This is especially true now as yearling bulls can possess considerably more genetic potential for growth than their ancestors.

PREBREEDING SEASON MANAGEMENT

Nutritional Management

One of the most common complaints of yearling bull purchasers is the run down condition these bulls can exhibit after their first breeding season. This situation can be largely avoided with good bull management. Whether the bulls were developed on the ranch, in a commercial facility, or at a centralized bull test, they were probably fed to gain from 2.5 to 4.0 pounds per day from weaning to one year of age. After coming off of test, and until they are turned out with females, they should continue to gain around 2.0 pounds per day.

Dry matter intake, energy and protein requirements as well as diet formulation is provided as a management aid. Bulls grazing a grass paddock may need to receive 8 to 13 pounds of grain per day, similar to those on dry hay. Some will argue that bulls should not be pampered with grain supplements, but to insure a long and reproductive life, their basic nutrient requirements must be met. Quality of forage is extremely important to formulating proper bull diets. Many diet formulations can easily satisfy yearling bull maintenance and growth requirements. For example, some producers will allow bulls to graze cereal grain pastures with minimal supplementation, while others will have to feed a complete diet in a drylot situation.

Protein Requirement

After achieving their first birthday, bull's protein requirements settle to about 10% of their total diet, depending on their dry matter intake. Usually this requirement can be met by adding one pound of a protein supplement per day to the grain portion of the diet. If high quality forage (pasture or hay) is fed, the additional protein supplement may not be needed. Forage testing and balancing the diet will pinpoint supplemental needs.

Mineral Requirements

Calcium and phosphorus are major minerals. Diets that contain approximately .40% calcium and .20% phosphorus are sufficient to meet dietary goals. The ration between calcium and phosphorus should be maintained at 2:1 or greater. In addition, trace mineral requirements should be met. Research has shown that feeding zinc at 60 ppm of the diet is beneficial to male reproduction. Other trace minerals like copper, manganese, and selenium should be monitored. Many commercial sources of trace minerals are available, but if desired a mixture of 40% dicalcium phosphate, 20% limestone, 30% trace mineral salt and 10% Selenium 90 premix can be used.

Vitamin Requirement

Any diet that includes high-quality, green forages should provide enough vitamin A to meet the yearling bull's requirement. Vitamin A is inexpensive to feed, and therefore diet fortification near 30,000 IU per day would be cost effective. If forages are weathered and/or of low quality, an intramuscular injection of 3 million IU of vitamin A is advisable. Injectable vitamin A will maintain adequate liver stores for over 100 days.

BREEDING SEASON MANAGEMENT

Number of Females

Setting absolute guidelines for cow-to-bull ratio is difficult because there are several variables that have an impact on this number. Examples are a bull's age, size, condition, and sex drive. Environmental factors like: size of the breeding pastures, type of terrain, climate, and length of the breeding season can also affect the correct cow-to-bull ratio. Absolutely, a yearling bull will not be able to service as many cows as an older counterpart. As a rough guideline, however, the working range is approximately 10 to 25 females per yearling bull during a 45 to 60 day breeding season.

Length of Breeding Season

A maximum of 45 to 60 days is an ideal length of breeding season for yearling bulls. Ninety days is an absolute maximum. One method of saving wear and tear on a yearling is to turn him out after an older bull has been with the herd for the first one or two heat cycles. Some producers rotate bulls in and out of pastures to assure a lazy bull's mates can get covered by another. Regardless of the management style, it is not advantageous to run yearling bulls with cows for long periods of time. They will waste a considerable amount of energy chasing cows and losing body condition instead of building up reserves for the next breeding season.

Observation

Try to observe the yearling bull closely to make certain he is detecting heat and breeding cows. Also, keep an eye on his condition. If he is getting too thin and rundown, he needs a rest. Thin bulls are more apt to hurt themselves, become less fertile, and have increased nutritional needs after the breeding season. Yearling bulls should not be pastured mated to cows that are extremely larger than themselves. Physically, this height mismatch may cause injury and failure to mate properly.

AFTER THE FIRST BREEDING SEASON

Feeding

Yearling bulls will probably lose from 100 to 300 pounds during their first breeding season. In addition to gaining back this weight during their first rest, they must also gain enough body mass as to achieve 75% of their mature weight by their second birthday. For example, if a bull's potential mature weight is 2,000 pounds, he should weigh at least 1,500 pounds at two years. If he weighed 1,250 pounds at turn-out time as a yearling and lost 200 pounds during the breeding season, he would need to gain about 2.0 pounds per day during the nine months until his second birthday. In order to gain 2.0 pounds per day, coming 2-year-old bulls may need to be fed 13 pounds of grain, protein supplement, and a full-feeding of hay. High quality forages could be utilized to reduce the grain and supplement portions of the diet. A word of caution: do not try to bring a bull back too fast with too much grain because of risk of foundering him.

Health Management

In the fall, after the first breeding season, treat the bull for internal and external parasites. The following spring, when he is two-years old, deworm him again and give him annual booster vaccinations against the diseases listed earlier.

Lacy Centerpoint 448 025F is the lead off Foundation 448 son in the 2019 offering. He is a well balanced herd sire prospect that we believe offers exceptional breeding versatility. Not only is he smooth made, clean jointed, and sound built, but he too boasts a 16 CED with a negative birth figure. He weaned off at over 750 lbs. after being raised by the natural great 8105 donor dam that has been a foundation female in our program, also the donor dam of the lots 5 ad 6 studs by Fritz Justice 8013. Centerpoint is balanced both phenotypically and numerically, offering the credentials of a true herd sire prospect. *Offering two-thirds semen interest and possession.*

LOT 2 - LACY FOUNDATION 026F

Lacy Foundation 026F is a dark red stud that is the definition of powerful. From the ground up he is a massive centered, bold ribbed, thick-topped stud that offers a balanced look of a rugged herd sire. He offered a sensible birth weight and over 700 lbs. of weaning weight performance off of the fescue pastures of Drexel, Missouri. His maternal grandam is the Annie 7020 matron that has been a steady producer in our program. 026F is a herd sire option that will add stoutness, power, and a three-dimensional body type to his progeny.

LOT 3 - LACY MAHOMES 448 015F

Lacy Foundation 015F is an ET son of the Lacy Mattie 115 matron that is a cornerstone female in the donor pen at Lacy's Red Angus. Mattie 115 is a massive centered female that sets the stage for maternal function, power, and balance. There is no denying his shear dimension, shape, and muscularity that he offers. The maternal aspect of 015F offers tremendous upside and we believe that this Foundation son will leave his mark on the program that selects him on October 27!

Offering two-thirds semen interest and possession.

Lacy Justice 086F is one of the darker red bulls in the sale. He is stout made and offers exceptional performance and stoutness. He ranks among the top 12% for GridMaster, top 1% WW, top 1% YW, top 3% ADG, top 7% CW, and top 14% REA. He is a true performance bull with added carcass merit, from a top daughter of the legendary Make Mimi 7249.

THE BULLS

LOT 9 - LACY LEGACY 417 082F

Lacy Legacy 417 082F is the lead off son of the great Lacy Legacy 6097 417 stud that has left behind a string of daughters in the herd that are second to none from a maternal function and practicality standpoint. This bull offers added body mass, fleshing ability, and a three-dimensional body type. He is backed by an 11-year-old dam that is sired by 5L Signature 5615. Longevity built into his multi-generational fescue adapted pedigree! He ranks among the top 17% WW, top 17% CEM, top 17% YG, top 12% REA, and top 25% HerdBuilder.

Lacy Legacy 417 173F is another sound heifer bull option if that is what your program is after. He offers a sensible and manageable 75 pound birth weight that is accompanied by a top 9% CED figure and a -1.2 BW EPD. He is among the top 2% of the breed for HerdBuilder, top 29% GridMaster, top 10% CEM, top 4% Stay, 13% Marb, and top 13% REA. A true standout on paper for a heifer bull to offer so many herd enhancing qualities from a carcass merit standpoint!

THE BULLS

LOT 17 - LACY FREIGHT TRAIN 459 101F

Lacy Freight Train 359 101F has been a standout since day one! He is massive in his type and kind, so when it was time to name the leading herd sire prospects it just made sense! Freight Train is a full brother to the \$16,000 sale topping Lacy Signature 459 075E to U-2 Ranch of Canada. He is a long sided, shapely bull that is big footed, stout boned, and offers exceptional performance to accompany his eye catching phenotype. Freight Train 101F is sired by Signature 459 and is backed by the 8105, making him a maternal brother to lot 1, 5, and 6. 8105 is a true matriarch female in the Lacy's Red Angus program and the proof is in the progeny! Freight Train boasts balanced figures, ranking among the elite 1% of the breed for HerdBuilder, top 10% Milk, top 19% YG, top 1% Stay, and top 21% REA. A carcass oriented stud that is stout, rugged, and generationally adapted to the fescue forage conditions of west central Missouri. A bull that will experience extensive use in our AI and ET program moving forward! *Offering two-thirds semen interest and possession.*

LOTS 43 & 44 - Lacy Kargo 118F and Lacy Kargo 120F are flush mate brothers sired by the great Canadian stud, Red Ringstead Kargo 215U, the sire of the \$60,000 Red Blairs Bingo. The donor dam of these two studs is the Lacy Marie 8190 matron that has been a steady producer. She is a high volume, productive, great uddered female that we have always admired for her angular front third, bold rib shape, and perfect udder quality. These flush brothers offer uniform data, ranking among the top 18% of the breed for HerdBuilder, top 7% of the breed for ME, and top 5% for Stay. A rare opportunity to acquire top Canadian genetics from one of the most phenotypically impressive females to ever grace the pastures of Lacy's Red Angus!

Red Soo Line Power Eye 161X has been a true breed icon and there is no denying the impact that he has made. Lacy Power Eye 087F is a direct son of the great 162X and from the Lacy Marie 8190 matron, also the dam of the two Kargo sired flush brothers. 087F is a stout, rugged, high performing stud that is unmatched in terms of substance, width, and dimension. He weaned off at over 730 pounds and started with a sensible 75-pound birth weight. He ranks among the top 5% for ME and top 13% CW. Study the power and substance if you sell your cattle by the pound!

Lacy Evolution 108F is the lone son of C-Bar Evolution 107Y, and backed by a productive Gold Bar 1120 daughter from the Verdale tribe. He is a balanced individual that offers double digit calving ease, a negative birth weight EPD, and triple digit yearling weight EPD. He ranks top 29% WW, top 22% YW, top 17% ADG, top 6% HPG, and top 2% CW. His 65-pound actual birth weight makes him a heifer bull option with the added bonus of generations of proven cow families stacked behind him!

THE FEMALES

LOT 47 - LACY LANA 7025 097F

The Daughters of Independence

Lacy Lana 7025 097F is an ultra complete, powerfully constructed maternal figure that offers trait leading performance and style. Her correct structural build is further complemented by her maternal body shape, depth, and dimension. Her dam is a productive female by the Julian sire line and from a Mimi bred maternal grandam. Her sire, 5L Independence 560-298Y has become one of the most widely utilized sires in the business. A true brood cow matron with unlimited upside!

LOT 48 - LACY LANA 7025 099F

Lana 7025 099F and Lana 7025 107F are two other members of the powerful Independence x Lana 7025 flush that yielded tremendous phenotype and performance in a perfectly blended package. Generations of maternal power cows line the pedigree of this mating and we believe that these females will make role model type females in the pasture. The toughest decision is which of the three females will be the best generator? We will let you sort them on October 27 in Drexel, Missouri!

Lacy Lakota 429 055F embodies the mass, body shape, and capacity that we have strived to breed into our cattle year after year. The dam of 055F is from the Lakota cow family and is sired by Lacy Summit 9020, from the 5L Summit 1145-6327 influence. She is balanced both phenotypically and numerically, ranking among the top 27% for HerdBuilder, top 25% CED, top 30% WW, top 25% Milk, and 7% CEM.

THE FEMALES

LOT 59 - LACY LAKOTA 061D 103F

Lacy Lakota 061D 103F is a stunning daughter of the popular and proven Silveiras Mission Nexus 1378 sire that has taken the breed by storm in terms of siring cattle with function, quality, and balance in all aspects of economic importance. The dam of this sharp featured young lady is by LSF Saga 1040Y and from the influential CCF Gold Bar 0251 on the maternal side of her lineage. 103F offers a look of a brood cow in the making phenotypically. She further solidifies these credentials with her top 19% BW, top 17% YW, top 13% ADG, top 26% YG, top 20% CW, and top 25% REA rankings.

CHANGING THE WAY CATTLE ARE FED.

UTILIZING ECONOMIC CORN

ARE WE CONCERNED ABOUT FEEDING CORN?

No, and here's why.

Intake Modifying Technology creates "snack eating" consumption habits. Meaning that cattle will consume grain in small 3-4# intervals throughout the day. This prevents the pH in the rumen from dropping and killing forage digesting microbes living there; allowing the animal to consume *more* forage between these small grain meals. This increases safety as it prevents more aggressive eaters from pushing others out and reduces the risk of them overconsuming grain.

Intake Modifying Technology can be the balance between providing a high energy feed to maximize genetic potential while enhancing forage utilization.

Purina's Accuration programs can be adjusted for all life stages of cattle.

For more information contact Mid-West Fertilizer Livestock Production Specialist Whitney Shaw at (417) 321-2651 or WLSshaw@landolakes.com

NEW TECHNOLOGY

WHAT IS RX3?

RX3 is a blend of probiotics, prebiotics, and plant extracts designed to prime the immune system of stressed calves to RECOGNIZE and RESPOND to a disease threat up to two days sooner leading to a faster RECOVERY.

Research proven to reduce morbidity while maintaining consistent average daily gains.

Available in all Purina starter feeds:

PRECON COMPLETE-long the gold standard of palatability. Hand fed product 10#/hd/day

STRESS CARE 5-nutrient dense starter supplement designed to be fed with home grown forages or top-dressed on TMR rations. 5#/hd/day fed rate.

ACCURATION STARTER-a high energy, textured, self-fed ration for excellent weight gains and labor savings.

ADD VALUE TO YOUR PROGRAM

by utilizing fescue-based **RED ANGUS** bulls & females
bred by **OUR** members for **YOUR** environment

Why Red Angus?

- Red in color with pigmented skin
- Improved heat tolerance
- Naturally polled & very docile
- Red crossed red always breeds true
- Resistant to pinkeye & sunburned udders
- High quality carcass with excellent intra muscular marbling
- Red Angus carry no diluter genes & avoids the grays that result when crossbreeding with blacks.

MFA
RICOCHET
FESQ MAX

Mineral supplement for cattle

- Vitamin fortified for improved animal health; covers animal's dietary vitamin requirements
- Supplies essential minerals of high bio-availability; calcium, phosphorus, magnesium, sodium, selenium, iodine, zinc, manganese, copper, cobalt; covers animal's mineral requirements
- Medicated for control of anaplasmosis for improved animal health
- Options available: nonmedicated, with CTC, and with Methoprene IGR/CTC, an effective pesticide to reduce the pressure of hornfly predation
- Flavored for good acceptance, consistent intakes
- **Uses Rain-Off® technology** to reduce weather damage to exposed product
- **Uses Shield™ Technology** to improve colostrum quality and production and stimulate the animal's immune response
- Uses essential oils that have been shown to improve animal performance grazing fescue pastures
- When Ricochet is used as a yearlong mineral program, it has high enough magnesium levels to prevent grass tetany
